DCS5010-CU Digital Chairman Unit

DCS5010-DU Digital Delegate Unit

- ❖ Fully-digital signal transmission and processing, completely eliminating RF interference from cell phone or similar devices.
- ❖ Stylish, low profile design with an OLED touch screen and a timer display to prompt a real-time countdown timer for the unit to be active with auto mic cut-off.
- ❖ The use of standard off-the-shelf UTP/STP cable coupled with RJ45 connectors makes installation & maintenance a breeze.
- ❖ Ring redundant loop network connection enables the system to operate and perform a hot-swap with automatic recovery function when there is a unit failure or a break in the line.
- ❖ Built-in high fidelity speaker unit which is automatically muted when the unit is in use to prevent acoustic feedback.
- ❖ Headphone output at both sides of the unit with adjustable volume knob.
- ❖ Line-In interface for connection to devices with audio output such as laptop or mobile phone for teleconferencing.
- ❖ Multiple chairman units can be set as VIP mode (up to 32 units) where every VIP unit can be simultaneously used.
- ❖ 16-level equaliser for individual tone control, limiter circuit to cap the output level of the unit and prevent clipping & distortion and Active Noise Control (ANC) to turn on the microphone only when in use.
- ❖ Automatic Gain Control (AGC) automatically adjusts the level of the unit in use for the optimum output level, Adaptive Feedback Cancellation (AFC) to prevent acoustical feedback and Auto-Mix to provide a uniform loudness for every delegate.
- ❖ Precision uni-directional high sensitivity condenser gooseneck microphone coupled with an acoustically transparent foam windshield to prevent noise pop.
- ❖ Bi-colour LED indicator ring at the gooseneck microphone and at the unit to indicate the unit status.
- ❖ Chairman unit (DCS5010-CU) comes with PRIORITY Override button to mute all delegate units.
